TESTIMONIALS

- ***I worked with Ari many, many times at The Tonight Show with Jay Leno, and he always nailed it! Always glad to see him in the booth.***

- **Mike Colasuonno
Writer-Producer-Director
(Former writer - The Tonight Show with Jay Leno)**

Ari is an absolute professional in his field. His voice is versatile, he is easy to work, directable & our clients are always very complementary to his abilities after working with him. he is a joy to work with on every project & I always find myself excited when he is chosen by my clients for a project.

**Michelle Summers
Vice President, VoiceCasting
Partner, VOPlanet**

- ***"Ari is super professional and we were ecstatic at how his voice over work really elevated the quality of our videos. We were so impressed by his work on our History of Corvette film that we immediately hired him to also do the voice work for our GM Corvette Assembly video.***

Ari completed the project quicker than expected and even let me listen in so that I could offer any feedback as we went along. He also provided several takes of some parts so we had multiple options to choose from. Ari is very versatile with his voice, and I would definitely use him again."

- Katie (Frassinelli) Ellison - Director of Marketing and Communications at National Corvette Museum

- ***Nobody has the range that Ari has: from the booming deep announcer, to a squeaky cartoon. Moreover, Ari has the acting skills to back up his resonance.***

OBJECTIVE

My objectives are to solve the needs and problems of companies & individuals worldwide. Also, to create content that will educate as well as entertain!

My chief goal is to make someone's life better at the other end of the line for having done the work I do. Hopefully many "someones."

SUMMARY OF QUALIFICATIONS

Abilities and experience includes operating digital recording equipment as well as basic editing, including removing extraneous audio anomalies, dividing audio up into multiple files (includes experience creating many multiple telephone/IVR files, cleaning up mistakes as well as processing audio for to clarify, as well as to brighten and/or effectively "punch up" the sound, when warranted/requested.

Conversion of various audio formats, including U-law for various telephony applications.
